

Sally Bussey

I am a parent governor with 1 child in KS2.

My background is in food science and the food industry managing technical teams within manufacturing businesses and sites. More recently, I have my own business consulting on food safety and the legality of food packaging to food retailers and caterers.

I am a member of the FReSH committee and link governor for health and safety, food and nutrition, breakfast and after-school clubs.

I became a governor when my son started school because I wanted to connect with people and felt I had some skills and experience that may be helpful albeit not in education.

The school is happy, lively and friendly. CARE values that run through the school instil a very positive environment for learning and development. I am proud to be part of the Old Fletton family.
